CIVIL AND STRUCTURAL ENGINEERING

We are a team of experienced Civil and Structural Engineers and Project Managers who work together to ensure projects are designed/built on time and to budget. We provide a professional affordable service for architects, builders, main contractors property developers and the insurance industry. We have successfully designed a number of structures throughout London and the UK.

Our projects range from small domestic developments including, side and rear extensions, loft conversions and basements conversions, to major residential and commercial projects including multi-storey design.

Our range of services include:

- Feasibility Studies and Advice
- Full Structural Calculations
- Structural Drawings including Structural Specifications
- Detailed Drawings and Sections
- Structural Risk Assessments
- R.C. Drawings and Bending Bar Schedules
- Foundation Design
- Structural Condition Surveys of Residential and Commercial Properties
- Project Management
- Civil Engineering, Drainage Design, Highways and all Hardstanding areas.
